### Airport Remarks

- Runway 12 is preferred for landing; Runway 30 is preferred for departure.
- Two PAPI lights located on the right side of the runway 12. **NOTE** that the indicated glide path angle is greater than 4 degrees.
- Radio position report with altitude, bearing and distance at 10 miles on 122.975.
- Radio position reports approaching downwind, established downwind, base, final, and clear runway.
- Expect significant changes in wind speed and direction over approach ends of runway.
- Runway 12 has significant upslope and higher terrain exists past departure end of runway.
- Alternative IFR landings: KTRI (Tri Cities), KHKY (Hickory) or OA9 (Elizabethton).
- Density altitudes of over 6000' common in summer.
- Minimum vectoring altitude from Atl & Tri - 8500'.
- Ceiling of 2000 AGL recommended.
- Multiple mountains with elev. greater than 1500' over airport within 10NM.
- No fuel available at Elk River.
- Rental cars available at KMRN, KHKY & KTRI with advance reservations.
- Nearest weather reporting stations; OA9, KTNB, KTRI, KGEV, KHKY, KMRN.
